BIRD WATCHING

BIRDING RALLY CHALLENGE-PERU 2013

From the 3rd till the 09th of December the 3rd Birding Rally Challenge took place on the south part of Peru. Important birdwatchers from the U.S., U.K., South Africa, and Colombia. During the competition the teams explored the Amazonian Jungle of Tambopata and the Cloud Forests of Machu Picchu in order to observe the most number of bird species. In the end the U.S. team Field Guides won this edition, with 457 bird species.

On December 9th, during the last day of the "Birding Rally Challenge" with the Sunbird Team from UK, we decided to walk to Mandor Valley at 4:00am since we were only one species from the first place of the contest .

After one hour walking in the rain, Gavin Bieber saw a dark silhouette on the train tracks, we knew it was a bird but it flew away. We kept waking and a few meters from where we saw the unidentified bird we noticed movement on the trees, we pointed our torches and saw a Band-bellied Owl (*Pulsatrix melanota*) a "lifer" (bird species seen for the first time). It was

the first Owl that I had ever seen in Machu Picchu. During the ceremony the judges told us that it was a new register for the Sanctuary of Machu Picchu. It was worth the walk in the rain,

Andean Bear Rescue Center | Centro de Rescate del Oso Andino (*Tremarctos ornatus*)

Inkaterra Asociación –ITA has created a rescue centre for this unique bear species. The goal of this project is the conservation and research of this bear, but also the rehabilitation and reinsertion of rescued specimens into the wild. The spectacled bear is the only native bear species of South America, and has a distribution that covers the high Andean region of Venezuela down south to Bolivia.
